### **DETAILED ACTION**

Claims 1-15 and 23-26 are pending in the present application, and they are subjected to the following species restriction.

#### ***Species Election/Restrictions***

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- 1. (a) *tularensis* subspecies strain; and (b) *novicida* subspecies strain.**
- 2. (a) *purF*; (b) *purD*; (c) *purN*; (d) *purT*; (e) *purl* and (f) *purM*.**

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1633

The claims are deemed to correspond to the species listed above in the following manner:

The claims encompass **a strain of *Francisella* species** wherein **a gene which encodes an enzyme in the purine pathway has been inactivated**, and which is able to produce a protective immune response in an animal, for use as a live prophylactic or therapeutic vaccine against infection by said *Francisella* species; a pharmaceutical composition and methods of using the same.

The following claim(s) are generic: at least claims 1, 9, 16, 23 and 25.

Each of the above listed species is different structurally, chemically and has different properties one from the others. Each different structure can be considered to be a "special technical feature"; and therefore the listed species lack the same or corresponding special technical features.
